Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Sadaie (US Patent 5,033,092).

Regarding Claim 1, Sadaie discloses an audio signal processing circuit for an audio reproduction apparatus at least having sound source located substantially at left and right sides to a listener, comprising: a phase difference control portion (2R and 2L) which receives a left channel signal (L) for the left sound source and a right channel signal (R) for the right sound source, controls a phase difference between the left and right channel signals so as to produce a relative phase difference in the range of 140 degrees to 160 degrees (Col. 6, lines 4-5), and outputs the phase difference controlled left and right channel signals for the left and right sound source (Speakers 4R and 4L), respectively.

Regarding Claim 2, Sadaie further discloses the phase difference control portion produces the relative phase difference of 140 degrees to 160 degrees in a frequency region ranging from 200 Hz to 1 kHz (Col. 5, lines 66-67).

Regarding Claim 3, a surround audio reproduction apparatus having a left and a right channels in front of a listener and a left and a right surround channels at left and right sides with respect to the listener, comprising; a phase difference control portion (2R and 2L) which receives a left surround channel signal (L) and a right surround channel signal (R), controls a phase difference between the left and the right surround channel signals so as to produce relative phase difference in the range of 140 degrees to 160 degrees (Col. 6, lines 4-5), and outputs the phase difference controlled surround left and right channel signals for a left and a right surround sound source (speakers 4R and 4L), respectively.

Regarding Claim 4, Sadaie further discloses the left and the right surround sound sources are a virtual sound source produced by a sound image localization processing (Col. 1, lines 8-12).

Regarding Claim 5, Sadaie further discloses the phase difference control portion produces the relative phase difference of 140 degrees to 160 degrees in a frequency region ranging from 200 Hz to 1 kHz (Col. 5, lines 66-67).

Regarding Claim 6, Sadaie discloses An audio reproduction method at least utilizing sound source located substantially at left and right sides to listener, comprising the steps of: controlling a phase difference between a left channel signal (L) for the left sound source (4L) and a right channel signal (R) for the right sound source (4R) so as

Art Unit: 2644

to produce a relative phase difference in the range of 140 degrees to 160 degrees (Col. 6, lines 4-5); and outputting the phase difference controlled left and right channel signals for the left and right sound source, respectively.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
